THAI THANH NAM

BACKEND DEVELOPER | NODE.JS | REAL-TIME SYSTEMS

0981771024 | thanhnam.thai01@gmail.com | Ho Chi Minh City, Vietnam

github.com/thanhnam2811 | namtt.dev | linkedin.com/in/thanhnam2811

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building production real-time systems using Node.js, WebSocket, Redis, and SQL databases. Developed 20+ multiplayer game servers supporting thousands of concurrent users, with hands-on experience in concurrency control, performance optimization, monitoring, and incident response. Built internal infrastructure and observability tools that reduced average incident response time by 40%.

TECHNICAL SKILLS

Backend	Node.js, Express.js, NestJS, Fastify, WebSocket, RESTful API, JWT
Databases & Cache	SQL Server, MySQL, PostgreSQL, MongoDB, Redis, Prisma
Languages	JavaScript, TypeScript, Java, Lua
DevOps & Tools	Docker, GitHub Actions, Linux, SVN, Postman

EXPERIENCE

ONKY **07/2023 - Present**

Game Server Developer | *Node.js, WebSocket, Express.js, SQL Server, MySQL, Redis*

- **Developed and maintained 20+ production real-time multiplayer game servers** using Node.js and WebSocket, extending the company core framework and supporting thousands of concurrent users.
- **Designed RESTful APIs and backend services** for lobby systems, session management, player synchronization, and internal tools using Express.js, SQL Server, MySQL, and Redis.
- **Built SOS Tool, a production monitoring and alerting platform** using Node.js, WebSocket, a master-worker architecture, Redis message queueing, Telegram, and Slack; automated log cleanup and incident reporting, reducing average incident response time by 40%.
- **Optimized high-concurrency request flows** by reducing redundant SQL queries and resolving race conditions, improving throughput and stability under load.
- **Built KPM, an internal process manager similar to PM2** with process lifecycle controls, health monitoring, and log management, simplifying game-server deployment and operations.

ONKY **05/2023 - 07/2023**

Game Server Developer Intern | *Node.js, WebSocket, SQL Server, Redis*

- **Built a 1v1 Caro server from scratch with pure Node.js and WebSocket** and analyzed/documented a production game-server codebase before implementing another multiplayer server with the client-side team.

FREELANCER **03/2023 - 07/2024**

Web Developer (Part-time) | *ReactJS, Express.js, Node.js, MongoDB, JWT*

- **Built a full-stack online learning platform** supporting quizzes, course materials, scoring, progress tracking, user management, JWT auth, and role-based admin access.

FosTECH **06/2022 - 04/2023**

Web Developer / Intern | *ReactJS, JavaScript, Webpack, REST API, Megapay API*

- **Developed retail and CRM interfaces** , integrated REST APIs and Megapay payment flows, and optimized Webpack configuration for development and production builds.

SELECTED PROJECTS

Matching Hub | NestJS, PostgreSQL, Prisma, Next.js, Docker github.com/thanhnam2811/matching-man

- **Built a multi-tenant Matchmaking-as-a-Service platform** with player/team queues, skill-based matching, Elo rating modes, idempotent write APIs, HMAC-signed webhook delivery with retry/backoff, API keys, and role-based access.

TinyLink | Fastify, Redis, PostgreSQL, Prisma, Docker github.com/thanhnam2811/tiny-link

- **Built and deployed a production-grade URL shortener** with Redis-cached redirects, Redis-backed rate limiting, click analytics, bot detection, link expiration/password protection, and in-memory event batching to PostgreSQL.

EDUCATION

Ho Chi Minh City University of Technology and Education (HCMUTE) **2019 - 2024**

Bachelor of Engineering in Computer Science (Information Technology) | GPA: 8.61 / 10
